

Delegation Name: China

Ambassador Name: Selin Kiling

Dear Honorable House Representatives and Fellow Delegates,

China greatly remarks the importance of international cooperation and global negotiation of responses given the extremely unfortunate times the whole world is currently facing. Therefore, any contribution to raising awareness is appreciated and endorsed as awareness is the first of many steps to maintaining efficient crisis management.

Although China fully supports the transnational involvement in collaboration with world governance, the promotion of unprecedented yet effective measures regarding the issue, raised by the Chinese government, is also approved of. China has been working scrupulously in order to devise protocols and programs pertaining to the issues that are to be discussed upon in the conference, such as global health threats, cyber sovereignty, and the impacts of climate change. China urges other nations to work on these organized projects collaboratively and form viable solutions, which is crucial in terms of global governance.

China perceives the aforementioned issues as international crises that can solely be solved with the international contribution of Member States with reference to world governance. Hence, China would like to urge the House to take notice of these projects in the conference and work towards an improved environment of global governance.
