

Delegation Name: Brazil

Ambassador Name: Bora Badak

Honorable Chairs and Fellow Delegates,

The Delegation of Brazil emphasizes the current COVID-19 crisis that has affected millions. We believe that in such vulnerable times, we must unite as one and establish order. As the delegation of Brazil, we are aware of the fact that we have a huge role in many issues, especially regarding environmental problems. We are looking forward to debating with other delegations to find a compromise we can support about issues of rebuilding the global recycling system, establishing sustainable low-carbon growth models, and the issue of the impact of fast fashion on climate change. The delegation of Brazil would like to emphasize that our priority is not to find new measures against these environmental issues but more so to find a compromise with other delegations. The delegate would also like to remind that refugees are an important issue for the delegation of Brazil since as of 2019 we are home to 32.860 of them. This is a major issue that is prioritized by many delegations and we hope to have great contributions to this issue.

Delegates, we would like to remind everyone that we are currently going through a crisis. A crisis that spreads stress and causes chaos. The delegation of Brazil hopes to have a productive session regarding issues of addressing the possible use of emergency powers since we strongly agree that allowing the establishment of emergency powers is the best way to spread the sense of urgency. During these vulnerable and trying times, we as the delegation of Brazil would like to debate on sensitive issues of “Assessing the potential risk of the weaponization of Artificial Intelligence” and “Reshaping international guidelines on unconstrained military expenditure” since we believe that states must debate and find compromises on these issues in order to prevent armed conflicts among member states.

We as the delegation of Brazil would like to state that we are in a global crisis. Many times, we saw how vulnerable humanity is during global crises. We wish to be able to spread the sense of urgency and to help states with easing the chaos this crisis has created. The delegate wishes to have productive sessions.
