

Delegation Name: North Korea

Ambassador Name: Yakup Cemal

Honorable President and Distinguished Delegates,

We as the delegation of North Korea, do think that Global Governance is an issue. The UN has been trying to stop our nuclear power by forming a Global Governance. We need our nuclear power and we are not willing to give away our powers. We as North Korea aim to be the strongest country in the world, and without such powers achieving such goals is not quite possible. Global Governance has failed to stop us in 2019, the UN has tried to make us let go of our powers but failed miserably. We think that Global Governance has no such right to control our government and decide what we can or can't do. We think that Global Governance is manipulative and is trying to make other countries act as they wish. As we have stated before we are not willing to let go of our powers, Global Governance can't stop us and we will be standing on our grounds.
